

Michael Stirm II

mstirmii@gmail.com | 609-335-8408 | in/mikestirm2 | Downingtown, PA | Open to Relocation | mikestirm2.com

AI enablement and instructional technology professional with experience building generative AI workflows, automation systems, and rapid prototypes for education and knowledge-management environments. Skilled in translating emerging AI technologies into scalable, user-centered solutions through prototyping, workflow automation, and technical instruction.

Tools & Platforms

AI Platforms & Tools: OpenAI, Gemini, Claude/Anthropic, ChatGPT, Prompt Engineering, AI Workflow Design, LLM APIs

Automation & Prototyping: Zapier, Make, n8n, Airtable, Lovable.dev, Replit, UI Path

Technical: Python, APIs, JSON, HTML/CSS, React, Tailwind CSS, Webhooks

Collaboration & Product: Agile Collaboration, Stakeholder Communication, Technical Training, User-Centered Design

AI Product & Automation Projects

AI & Education Current Awareness Dashboard | aiedudashboard.lovable.app

- Addressed fragmented manual monitoring processes by creating an AI-powered dashboard for academic librarians and instructional teams.
- Designed and deployed an AI-assisted monitoring platform using LLMs, APIs, and automation workflows to aggregate and prioritize AI and higher-education developments in near real time.
- Built scalable workflows focused on usability, source transparency, recency prioritization, and decision support for academic stakeholders.

Instruction Assistant | docs.google.com/presentation/d/1hnGo2wBWldt7XBS9EOJ4xlzAI5y1-E_622oGylJ4cTg

- Developed a generative AI workflow that transforms scholarly research into instructional content, discussion prompts, and citation-ready classroom materials.
- Implemented prompt engineering and automation pipelines using Zapier, APIs, and LLM platforms to reduce manual instructional preparation time.
- Built AI-assisted instructional workflows aligned with ACRL frameworks and scalable instructional design practices.

AI-Assisted Research Support & AI Literacy Landing Page | researchsupport.lovable.app

- Built an AI-enhanced research support platform helping students access librarian services and learn responsible AI usage practices.
- Developed responsive AI-enabled user experiences using React, Tailwind CSS, low-code prototyping tools, and Calendly integration.
- Improved access to research support and AI literacy resources through user-centered design and scalable digital workflows.

Professional Experience

AI Automation Specialist | TripleTen Apprenticeship| 2025 – 2026

- Designed and deployed AI-assisted instructional tools, research support systems, and workflow automations using LLM platforms, APIs, Zapier, Make, n8n, and webhooks.
- Built domain-specific AI chatbots and scalable automation pipelines focused on prompt engineering, usability, responsible AI adoption, and operational efficiency.
- Developed hands-on AI learning resources and technical workflows supporting practical implementation of generative AI tools for non-technical users.

Web Developer, Freelance| 2018 – Present

- Designed, deployed, and maintained responsive instructional and research-focused websites using HTML, CSS, JavaScript, React, APIs, and AI-assisted development tools.
- Built user-centered digital experiences emphasizing accessibility, mobile-first performance, scalable content delivery, and rapid prototyping workflows.
- Collaborated with stakeholders to translate instructional and operational needs into scalable web-based solutions improving digital access and user engagement.

Adjunct Professor of English, Saint Joseph's University| 2019 – 2020

- Delivered digital literacy, research, and information literacy instruction to 180+ students through writing-intensive undergraduate courses.
- Designed and launched a custom WordPress course platform, improving student access to instructional materials and reducing course-related inquiries by 50%.
- Developed learner-centered instructional resources integrating ethical research practices, responsible technology use, and digital learning workflows.

Education

AI Automation Certificate, TripleTen
Master of Information, Rutgers University
MA in English, Rutgers University
BA in English, Saint Joseph's University

2026
