AI Automation & Operations Professional combining multifamily housing experience with AI implementation, workflow design, and process improvement. Builds AI-powered systems that improve operational efficiency, resident service, and business workflows.

Skills

Property Technology: Entrata, Resident Service Operations, Work Order Management, Preventive Maintenance, Vendor Coordination, Make-Ready Operations

AI & Automation: OpenAI, Claude, Gemini, Zapier, Make, n8n, UiPath, Airtable, APIs, Webhooks

Technical: Python, JSON, HTML/CSS, React, Prompt Engineering, Workflow Design

AI Product & Automation Projects

AI Work Order Triage Assistant (Prototype) | In Progress

- Designing an AI-powered maintenance workflow that converts resident-submitted work orders into structured, prioritized service requests using LLMs and automation platforms.
- Automates classification, urgency scoring, routing recommendations, and recurring issue detection to improve operational efficiency and support predictive maintenance initiatives.

Client Intake Automation Pilot | client-intake-automation.lovable.app

- Designed and deployed an AI-assisted intake workflow that transforms new client inquiries into structured operational records, prioritized recommendations, and response-ready communications.
- Implemented automated classification, urgency assessment, summary generation, and workflow tracking using LLMs, automation platforms, and structured business logic.
- Reduced manual intake processing by centralizing inquiry data, improving visibility into request status, and supporting faster staff response workflows.

Automated LinkedIn Thought-Leadership Post Generator | mikestirm2.com/work

- Designed and deployed an end-to-end content automation pipeline that transforms external articles into attribution-aware LinkedIn publications aligned with client-specific voice profiles.
- Integrated web scraping, metadata extraction, LLM processing, validation rules, and structured publishing workflows using Make and OpenAI APIs.
- Built reusable workflow components that improved content consistency, reduced manual effort, and supported scalable publishing operations.

Professional Experience

Maintenance Technician, The Westover Companies | 2023 – Present

- Supports operations across two multifamily residential communities, coordinating maintenance, inspections, repairs, and resident service requests.
- Collaborates with property managers, vendors, and residents to resolve operational issues and maintain service standards.
- Applies structured troubleshooting, workflow management, and prioritization techniques to support efficient work-order execution.
- Utilizes Entrata and related property management systems to support maintenance operations, resident service requests, and workflow coordination.

AI Automation Specialist | TripleTen Apprenticeship | 2025 – 2026

- Designed and deployed AI-assisted instructional tools, research support systems, and workflow automations using LLM platforms, APIs, Zapier, Make, n8n, and webhooks.
- Built domain-specific AI chatbots and scalable automation pipelines focused on prompt engineering, usability, responsible AI adoption, and operational efficiency.

Owner & Operator, Bavarian Mechanical | 2021 – 2023

- Managed all business operations for an independent property services company serving residential clients throughout the Greater Philadelphia region.
- Maintained a 5-star rating across 140+ customer reviews through responsive communication and operational reliability.
- Built and deployed a Facebook Messenger chatbot to automate common customer inquiries and improve responsiveness.

Education

AI Automation Certificate, TripleTen
Master of Information, Rutgers University
MA in English, Rutgers University
BA in English, Saint Joseph's University

2026
