

Michael Stirm II

mstirmii@gmail.com | 609-335-8408 | in/mikestirm2 | Downingtown, PA | Open to Relocation | mikestirm2.com

Online learning librarian with 10+ years of experience designing and delivering digital learning in higher education and academic libraries. Specializes in LMS-integrated instruction, information literacy, and assessment, with a growing focus on building ethical, AI-assisted instructional tools and automation workflows. Known for translating emerging technologies into practical, scalable solutions that improve teaching efficiency, research support, and learner outcomes.

Technical Skills

AI & Automation: Workflow Automation (Make, Zapier, n8n), Robotic Process Automation (RPA - UI Path), Prompt Engineering (Gemini, ChatGPT), AI Chatbots, Process Mining & Analysis (Miro), Lovable.dev, CRMs (HubSpot – Customer Relationship Management)

Technical: Python, HTML, CSS, System Integration (APIs, Webhooks), Google Workplace, Microsoft Office Suite (Advanced Excel), Generative AI, No-Code/Low Code, JSON

Professional: Business Process Improvement (BPI), Stakeholder Management, Data Analysis,

Technical Projects

AI & Education Current Awareness Dashboard | aiedudashboard.lovable.app

AI-powered dashboard for librarians monitoring AI and higher-education developments

- Solved manual, fragmented monitoring of AI and higher-ed news for academic librarians
- Built an AI-powered dashboard prioritizing recency, source transparency, and context
- Built with Lovable, APIs, LLMs, caching, and pagination for scalable updates

Instruction Assistant | docs.google.com/presentation/d/1hnGo2wBWldt7XBS9EOJ4xlzAI5y1-E_622oGylJ4cTg

AI-powered planning assistant for librarians generating instruction materials from new scholarly research

- Addressed slow, manual translation of new research into ACRL-aligned teaching materials
- Automated teaching points, activities, discussion prompts, and APA citations
- Built with Zapier, scholarly APIs, LLMs, and instructional design frameworks.

AI-Assisted Research Support & AI Literacy Landing Page | researchsupport.lovable.app

AI-enhanced research support site for students scheduling librarian help and learning responsible AI use

- Solved student confusion around AI use and difficulty accessing research support
- Built an AI-enhanced site for AI literacy guidance and librarian scheduling
- Built with Lovable, React, Tailwind CSS, and Calendly integration

Professional Experience

Professional Development and Contract Work

2020 - Present

Adjunct Professor of English, Saint Joseph's University | 2019 – 2020

- Delivered information literacy and research instruction to 180+ students through research-intensive writing and communication courses.
- Designed and launched a custom WordPress course site, reducing student inquiries by 50% and improving clarity of assignments and resources.
- Strengthened ethical research practices by creating scaffolded, project-based assessments integrating digital literacy and responsible source use.

Library Associate, Atlantic County Library System | 2013 – 2017

- Led system-wide adult education, cultural programming, and digital literacy initiatives across a multi-branch public library system.
- Planned and delivered technology training and community programs aligned with workforce readiness and lifelong learning goals.

Library Assistant, Atlantic Cape Community College | 2012 – 2013

- Delivered course-integrated information literacy instruction through 30+ workshops supporting undergraduate research.
- Increased use of library resources by collaborating with faculty on discipline-aligned instruction sessions and custom research guides.
- Improved instructional services through data-informed refinements based on student feedback and workshop usage patterns.

Education

AI Automation Certificate, TripleTen

2026

Master of Information (ALA-accredited), Rutgers University

MA in English, Rutgers University

BA in English, Saint Joseph's University
