AI Enablement Specialist

AI enablement and automation professional with hands-on experience translating business and operational challenges into practical generative AI solutions, automated workflows, and working prototypes.

Experienced with ChatGPT, Claude, Gemini, OpenAI APIs, prompt engineering, workflow automation, requirements discovery, process improvement, and human-centered AI implementation. Combines technical problem-solving with extensive training, facilitation, documentation, and stakeholder communication experience to help technical and non-technical users adopt emerging AI technologies effectively. Skilled at developing and testing AI-assisted workflows, troubleshooting automation issues, creating reusable instructional resources, and communicating complex AI concepts through demonstrations and practical learning experiences.

Areas of Expertise

- Generative AI Enablement
- Workflow Automation
- Business Process Improvement
- AI Use Case Development
- Requirements Discovery
- Prompt Engineering
- AI Prototyping & Proofs of Concept
- AI Training & Facilitation
- Stakeholder Engagement
- Technical Documentation
- Workflow Testing & Troubleshooting
- Human-Centered AI

Career Experience

AI Automation Specialist • TripleTen Apprenticeship **2025 to 2026**

Designed, tested, and refined AI-powered workflows and lightweight proofs of concept using ChatGPT, Claude, Gemini, OpenAI APIs, Make, n8n, Zapier, webhooks, JSON, and other automation technologies to address business, operational, educational, and information-management use cases.

- Applied prompt engineering, workflow automation, API integration, and human-centered AI design to translate process inefficiencies and user requirements into practical technology-enabled solutions.
- Built and iteratively refined AI-assisted workflows for client intake, customer feedback analysis, document processing, research support, and instructional planning, incorporating testing, reviewer feedback, troubleshooting, and human-in-the-loop review.
- Developed recorded workflow demonstrations and instructional walkthroughs that translated technical processes into practical learning resources supporting AI experimentation, adoption, and effective use.
- Designed an AI-assisted legal document workflow for a real client incorporating OCR, document intelligence, deterministic PII masking, AI-assisted translation, APIs, n8n orchestration, and human review; received the **Scalability Visionary Award** for the solution.

Web Developer • Freelance **2018 to Present**

Deliver user-centered technology solutions for clients by translating stakeholder requirements and operational needs into responsive web applications, digital platforms, and practical technology-enabled improvements.

- Lead requirements discovery, project scoping, solution planning, rapid prototyping, and roadmap development in partnership with clients and stakeholders, independently managing priorities from concept through delivery.
- Build scalable instructional, research, and operational platforms using HTML, CSS, JavaScript, React, APIs, and AI-assisted development tools, emphasizing usability, accessibility, and performance.
- Evaluate client needs and technical requirements to recommend practical implementation approaches while managing project scope, timelines, budgets, and evolving requirements.

Adjunct Professor of English • Saint Joseph's University **2019 to 2020**

Designed and delivered research, writing, information literacy, and technology-supported instruction for 180+ undergraduate students, translating complex concepts into accessible learning experiences for non-technical audiences.

- Built a customized WordPress learning platform that centralized instructional resources and reduced course-related support inquiries by 50%.
- Created instructional materials and learner-centered activities supporting research methodology, digital literacy, ethical information use, and responsible technology integration.

…Continue…

Outreach Assistant • Cape May County Library System **2017 to 2018**

Supported community technology education, digital literacy, VR programming, outreach, and cross-functional engagement.

Library Associate • Atlantic County Library System, Egg Harbor Township Branch **2013 to 2017**

Led programming and service-improvement initiatives, including a 15+ member committee; increased participation by 50% and directed a grant-funded regional humanities initiative.

Selected AI Enablement & Automation Projects

AI-Assisted Legal Document Workflow **2026**

Designed and built an award-winning, privacy-aware AI workflow for a real client using n8n, APIs, prompt engineering, OCR, document intelligence, deterministic PII masking, AI-assisted translation, and human-in-the-loop review. Designed for scalability, multilingual processing, precision, and practical business value; created a recorded Loom walkthrough demonstrating the solution.

Client Intake Automation Pilot **2026**

Designed and built an AI-enabled workflow prototype using Make and OpenAI to streamline professional-services intake by capturing inquiries, generating AI summaries and prioritization, updating a shared tracker, and preparing response-ready drafts for human review—demonstrating practical workflow automation and operational efficiency improvements.

Customer Feedback Analysis Workflow **2025**

Designed, tested, troubleshot, and iteratively refined an end-to-end workflow using Gemini, Make, Google Forms, Google Sheets, structured JSON, and conditional logic to transform unstructured feedback into sentiment classifications, summaries, actionable insights, and automated negative-feedback alerts; incorporated reviewer feedback and resolved parsing, timing, and workflow-logic issues.

Human-Centered AI Workflow for Academic Librarians **2026**

Designed an end-to-end GenAI workflow spanning instruction-request intake and triage, ACRL-aligned planning, NotebookLM course-material analysis, AI-assisted lesson development, Gamma presentation generation, and PowerPoint export while maintaining human oversight over instructional judgment and final content. Created reusable Loom demonstrations for multiple workflow components and presented the approach at the 2026 Generative AI in Libraries Conference.

Selected Presentation

Generative AI in Libraries Conference (GAIL 2026) • "A Human-Centered AI Workflow for Academic Librarians" Selected Presentation

Education

Master of Information • Rutgers University

Master of Arts in English • Rutgers University

Bachelor of Arts in English • Saint Joseph's University

AI Automation Certificate • TripleTen, 2026

***Technical Skills*: Generative AI:** *ChatGPT | OpenAI | Claude/Anthropic | Gemini | NotebookLM | Prompt Engineering | LLM APIs*
Automation & AI Workflows: *Make | n8n | Zapier | UiPath | Webhooks | APIs | JSON | AI Workflow Design*
Development & Prototyping: *Lovable | Replit | React | HTML/CSS | Tailwind CSS*
